Deadline for manuscript
submissions:

31 July 2021

Message from the Guest Editor

Dear Colleagues,

This Special Issue aimed to explore the use of innovative approaches in dentistry and maxillofacial surgery.

This Special Issue welcomes proof of concepts, and clinical papers that examine the effectiveness of innovative technologies in the diagnostic and therapeutic workflow. We aim to receive and publish systematic and narrative reviews, randomized controlled trials, prospective and retrospective studies, as well as case reports that accord to the EQUATOR guidelines. The main topics for the Special Issue are presented below:

- Dental radiology: Cone-beam computed tomography, ALARA principles, and ionizing radiation exposure;
- Three-dimensional imaging: accuracy and reliability of integration of digital data, precision of intraoral scanners and digital models, stereophotogrammetry, virtual/digital setup, and esthetic assessment;
- Orthodontics: clear aligners, custom-made orthodontic appliances, tooth movement, and growth and development;
- Maxillofacial surgery: cleft lip and palate, facial asymmetries, surgery-first vs. conventional orthognathic surgery, and guided surgery.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2020).
