Dr. Cynthia Blanton

Department of Nutrition and Dietetics, Idaho State University, Pocatello, ID 83201-8117, USA

Deadline for manuscript submissions:

closed (28 February 2023)

Message from the Guest Editors

Dear Colleagues,

The International Journal of Environmental Research and Public Health is preparing a Special Issue focusing on the effects of dietary polyphenols on health. Polyphenols are plant compounds that possess bioactivity in the body, including in supporting oxidative defense.

This Special Issue aims to compile current research on the health benefits of dietary polyphenols. This is an active area of research involving multiple disciplines and we seek to present varied perspectives that provide up-to-date evidence linking polyphenols to health outcomes. Invited manuscripts include original research articles, food-based and supplement investigations, longitudinal and cross-sectional studies, intervention and epidemiological research, meta-analyses, and reviews.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
