### Message from the Guest Editor

This Special Issue in the International Journal of Environmental Research and Public Health is devoted to recent findings on “Environmental Supports and Physical Activity”, with a specific focus on children and youth. This Issue will make a substantial contribution to the knowledge base toward a better understanding of how built and physical environments/settings are potential barriers and/or determinants of youth physical activity behaviors. Insight into this important area can better inform policy makers on what to consider when developing/designing new environments for activity. A wide range of topics will be included in this Issue, related to but not limited to varying environmental supports, such as playgrounds, parks, park amenities (e.g., playing fields, courts, aquatic facilities), trails located in parks, paved recreational trails, natural surface trails, hiking trails, greenspaces, sidewalks, paths connecting neighborhoods, street lighting, presence of trees, fitness centers, etc., and their impact on physical activity and the physical/social emotional wellbeing of children and youth.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
