Environmental Health Impacts of Hydraulic Fracturing

Message from the Guest Editor

Hydraulic fracturing has opened up previously-inaccessible oil and gas deposits to economical recovery. At the same time, concerns have been raised over the health and ecological impacts of the process. A variety of potential impacts on health have been proposed including occupation accidents, water and air contamination, and stress associated with community changes. Regulatory approaches have spanned a range from acceptance to categorical bans of the practice. There is a need for research to identify the magnitude of the risks as well as mitigation options, so that appropriate regulatory actions can be taken. For this Special Issue we invite submissions examining the relationship between hydraulic fracturing activities and public health. The topic is construed broadly to include any research that contributes to identifying or mitigating health risks due to hydraulic fracturing. Studies of interest include epidemiological studies, risk assessments, environmental impact assessments, and regulatory policy analyses.

Deadline for manuscript submissions:
closed (1 August 2018)
Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

**Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2019).
