

Fetal Alcohol Spectrum Disorder (FASD)

Guest Editors:

Dr. Svetlana Popova

Dr. Larry Burd

North Dakota Fetal Alcohol Syndrome Center, Department of Pediatrics, University of North Dakota School of Medicine and Health Sciences, Pediatric Therapy Services, Altru Health System, Grand Forks, ND, USA

Deadline for manuscript submissions:

closed (30 April 2019)

Message from the Guest Editors

The goal of this Special Issue is to publish papers that expand our current knowledge of prenatal alcohol and other substances' exposure and FASD and make it accessible to the research community, educators, policy makers, and others interested in this area. We invite all FASD-related research submissions, and we especially encourage the submission of papers from authors in developing countries where there are less infrastructure and traditional support of research on prenatal substance use exposure and FASD. The keywords listed below provide an outline of some of the possible areas of interest.

- prevention
- treatment
- recent advances in screening and diagnosis
- therapeutic and non-therapeutic interventions
- comorbidities
- mortality
- epidemiology
- economic cost
- risk factors of maternal substance use and FASD
- outcome trajectories (children, adults, and elderly people with FASD)
- law enforcement
- service delivery (i.e., health care, special education, etc.)
- experience and perception (patients and carers living with FASD, and practitioners)
- policy

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
