submissions:

30 April 2025

Message from the Guest Editor

The long-term care (LTC) sector is an overlooked, under-resourced, and understudied healthcare sector. The COVID-19 pandemic brought to the surface systemic, long-standing, and pervasive deficiencies within the sector, resulting in significant human suffering and tragic loss of life. The LTC deficiencies have led to serious difficulties with the provision of high-quality person-centered care for LTC residents, further marginalizing LTC residents and their providers, who are known to be adversely impacted at the intersection of many diversity factors such as age, race, gender, immigration, and disability. The questions are: What can we do to address LTC deficiencies that compromise high-quality, person-centered care for LTC residents? What policies and practices improve the provision of quality, safe, and equitable care in LTC? This Special Issue invites researchers to share new research and perspectives on care delivery in LTC, especially evidence-informed strategies at different system levels

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
