Message from the Guest Editor

Scientific and reasonable green planning and environmental policies play a key leading role in the sustainable development of a country and region.

This Special Issue is aimed to providing selected contributions on advances in green planning and environmental policy designation:

- Large scale ecological and environmental protection planning and Strategies;
- Territory space ecological collaborative planning;
- Multi scale spatio-temporal prediction and public health planning response of urban heat island and urban wind and COVID-19;
- Theories and methods of urban form optimization and urban green infrastructure;
- Urban Ventilation and urban health;
- Ecological space optimization of urban built environment;
- Multi scale prediction and implementation effect evaluation under multi scenario of carbon peak and carbon neutralization;
- Application of new technologies in urban environmental ecological planning and public health.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
