Deadline for manuscript  
submissions:

**closed (30 November 2020)**

### Message from the Guest Editors

Over the past five years, there is increasing recognition by governments and NGOs of the need to understand and address LGBT+ health inequalities (e.g. UK House of Commons, 2019; European Union, 2018). There is growing evidence to demonstrate that LGBT+ people experience health inequalities when compared with heterosexual and cisgendered people. Such health inequalities are acute in mental, sexual and physical health, health risk behaviours including higher rates of substance misuse, smoking, alcohol consumption, and preventing loneliness, which affects both physical and mental health. This special issue is interested in papers on various aspects of LGBT+ health inequalities including, but not limited to, those discussed above. We encourage the submission of inter-disciplinary and collaborative work. In particular, we seek theoretically informed papers, intervention studies, practice-focussed reports, knowledge translation studies, papers of health equity models, policy development or systematic reviews. We welcome original studies using qualitative or quantitative approaches.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
