Message from the Guest Editors
Dear Colleagues,

Health promotion can be understood in different ways in relation to sport and this special issue aims to explore this relation in-depth.

In the present issue, we consider sport in a broad sense, including both competitive and recreational sport, targeting all groups across the lifespan and socio-economic gradient, including every day and non-organized sport practice.

This special issue of IJERPH focuses on research such as:
Health-promoting settings-based approach to sport (HPSC-related research)
Health promotion through sport (using sport as a tool for health promoting outcomes or sustainable development goals)
Health promotion in sport (Health promotion initiatives performed in the sport setting)
Health promotion in relation to emerging concepts within the field such as physical literacy

In this special issue, we invite researchers from different scientific disciplines to submit papers that combine or use diverse methods.

Assoc. Prof. Susanna Geidne

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, GEOBASE, Embase, CAPlus / SciFinder, and many other databases.

**Journal Rank:** *JCR* - Q1 (*Public, Environmental & Occupational Health*) / *CiteScore* - Q2 (*Public Health, Environmental and Occupational Health*)
