Neuroscience and Advanced  
Diagnostics (BI.N.D.), University of  
Palermo, 90100 Palermo, Italy

Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### Message from the Guest Editors

Healthcare evaluation is an essential tool to assess the quality, importance, value, or adherence of a service or process or structure and comprises rigorous quality measurement methods. Circumscribing healthcare evaluation is challenging as it comprises the assessment of structures, process, output, and outcomes. The choice of measures and methods depends on the evaluation framework used as well as on their objectives. The evaluation of healthcare services and treatments can be addressed to measure the organizational efficacy and clinical effectiveness of diagnostic and therapeutic care pathways and protocols. Specifically, we would be delighted to receive papers investigating the impact of the current pandemics on all wards' organizational efficiency with particular insight into COVID-19 wards.

Reducing inequality in health remains one of the European Union's burning issues, and it is also an ambitious goal for each civil society. Inequality in health is influenced by socioeconomic, cultural, legal, political, and structural factors.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
