Message from the Guest Editors

Dear Colleagues,

There are strong relationships between exposure to intimate partner violence and child maltreatment. However, many statutory agencies are tasked with intervening for one or the other (adult victim or child victim). Increasingly, there are calls within the mental health, child protection, and judicial services for child-focused services to provide support for adults and for adult-focused services to also provide support for children.

This Special Issue will focus on the impact of intimate partner violence on child development, providing an advocacy tool for viewing the family as a whole. We welcome papers that address associated risk factors (including poverty and drug/alcohol exposure), as well as those which seek to understand the experiences of indigenous communities and various ethnic backgrounds.

Guest Editors: Dr. Pauline Gulliver, Brooke Takala

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
