The previous Special Issue "Internet and Mobile Phone Addiction: Health and Educational Effects" (2017–2018) was a successful achievement with twenty interesting papers been published. It can be found at https://www.mdpi.com/journal/ijerph/special_issues/internet_addiction. The second edition relies on recent developments in internet and smartphone use-related addiction health problems.

First, we invite studies on how these problems are being diagnosed, the profiling of these patients, the usual comorbidity, treatments applied, and their prognosis. Second, we want to know how these problems could be tackled from an educational and preventive perspective, if any policy options have been applied and the consequences, if any educational intervention is undertaken, even as a preventive action, or on how education has developed on these health problems. Third, any research focused on the role of the internet in different fixed or mobile technologies is expected.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
