Deadline for manuscript
submissions:

31 March 2024

Message from the Guest Editors

Dear Colleagues,

Bioremediation aims at mitigating environmental organic and inorganic pollution exploiting different organisms (e.g., algae, plants, bacteria and fungi) from environmental matrices such as water and soil. Compared to other approaches, it is ecofriendly, safer for the professional workers, and is often cheaper. In the last few years, many authors have confirmed the effectiveness of several organisms, especially at a laboratory scale; however, there is still a lot of work to be done to select new organisms and to scale up these technologies to make bioremediation a routine process.

We are pleased to announce this Special Issue entitled “Topical Advisory Panel Members' Collection Series: Applied Ecology and Bioremediation”. This Special Issue will contain papers from researchers invited by the Topical Advisory Panel Members. This Special Issue aims to provide a venue for networking and communication between *IJERPH* and scholars in the field of applied ecology and environmental microbiology. All papers will be published with fully open access after peer review.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
