Message from the Guest Editors

Dear Colleagues,

In recent years, enormous changes have occurred in the environment, in daily life, and also in the world of work. The protection of the population and workers' health must also evolve over time, as new knowledge and technological/methodological innovations are required to properly address the problems related to the assessment and management of risk for human health.

With a particular focus on chemical risk but extended to a wide range of occupational and environmental settings and exposure types, this Special Issue aims to collect scientific contributions useful for exploring research and practice in the field of risk assessment and management applied to environmental and occupational hygiene.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
