### Message from the Guest Editors

The suffering caused by moral distress has become more evident during the COVID-19 pandemic, where many clinicians have found themselves need to provide care in a context of limited resources. However, evidence is needed to better comprehend the relationship between moral distress and mental health outcomes among healthcare professionals. As moral distress may lead to positive behavioral and organizational changes if it is recognized and respected, the search protective factors for organizations and individuals should be promoted. Finally, as moral distress is becoming an emerging issue during the COVID-19 pandemic, new evidence is needed to design effective interventions to counteract it. In this Special Issue, we invite authors to contribute research exploring the links between moral distress and mental health, and on the factors and interventions that can address this phenomenon. New research papers, reviews, and case reports are welcome to this Issue. Papers reporting new approaches to assess and address moral distress are also welcome.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Paul B. Tchounwou**

Department of Biology, College of Science, Engineering and Technology, Jackson State University, 1400 Lynch Street, Box 18750, Jackson, MS 39217, USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, GEOBASE, Embase, CAPlus / SciFinder, and many other databases.

**Journal Rank:** JCR - Q1 (*Public, Environmental & Occupational Health*) / CiteScore - Q2 (*Public Health, Environmental and Occupational Health*)
