Message from the Guest Editors

Globally, one in seven of the world's population is a migrant. The rise in global mobility and its positive and negative impact on individuals, families, communities, and nations have led to increased attention toward the needs and challenges of migrants. Moreover, the scale and significance of migration worldwide makes it a critical topic for health research and interventions. To ensure that “no one is left behind”, we need to understand which interventions are effective in protecting and improving the health of migrants and under what conditions. For this issue, we invite articles that offer new insights and evidence to contribute to the global knowledge base regarding migrant health. Manuscripts on the following topics are especially welcome (although all relevant papers will be considered): improving healthcare services, trauma and mental health, immigration and labor laws, the protection of migrant workers, occupational health, poverty and inequities, reduction of public resentment/discrimination, gender-based violence, sex work, migrants as brides, resettlement, and reintegration of migrants who return home.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
