Message from the Guest Editor

Latin Americans are a large, multi-ethnic population from Latin American countries (more than 20 countries across South, Central, and North America) and dependencies, whose primary languages are Spanish and Portuguese. In addition to living in their countries of origins, Latin Americans are now amongst the largest and fastest growing population groups in several countries across the globe including the United States, Spain, Canada, Japan, United Kingdom, Portugal, and Australia.

This Special Issue will focus on current psychological, socio-cultural, and environmental factors that influence maternal and child health and nutrition, both in early and later life among Latin American populations across the world and innovative strategies to prevent and address maternal and child health and nutrition issues affecting Latin American population groups.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
