### **Message from the Guest Editors**

Patient interest in the use of cannabis and cannabinoids to treat a variety of conditions has increased over the last decade. Increased patient demand has also been accompanied by renewed scientific interest in the therapeutic effects of cannabis, and several clinical trials have recently evaluated the medical use of cannabinoids. Although the evidence base is limited and inconsistent, findings from systematic reviews of currently available controlled clinical trials suggest that cannabinoids, when used as either adjunctive treatment or a drug of last resort, relieve some of the symptoms of some illnesses (e.g., neuropathic pain and spasticity in multiple sclerosis, chronic non-cancer pain, intractable childhood epilepsy).

Deadline for manuscript  
submissions:

**closed (30 December 2022)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
