Huelva, Spain

Deadline for manuscript  
submissions:

**closed (31 May 2023)**

### **Message from the Guest Editor**

Healthcare professionals usually work in stressful contexts, in which they often undergo continuous contact with human suffering, difficult working conditions (shifts, working hours, time and material available, etc.) and inadequate social recognition or visibility, which sometimes translates into little opportunity for career development or advancement.

Improving the quality of life of healthcare professionals would have a double potential benefit: preventing physical and/or mental health problems in a very large population group (healthcare workers) as well as preventing the possible effects that these problems could have on their professional work.

Articles describing the occupational and individual determinants of the quality of life of healthcare professionals, as well as those that can respond to the relationship between quality of life and quality of nursing care, are welcome. Works that evaluate the effectiveness of interventions to improve the quality of life (global or some of its dimensions) of healthcare professionals will also be considered.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
