Deadline for manuscript  
submissions:

**closed (31 January 2023)**

### Message from the Guest Editors

The World Health Organization declared COVID-19 caused by SARS-CoV-2 a global pandemic on 11 March 2020. The disease has negatively affected health systems and economies worldwide, and has negatively affected life expectancies and quality of life, especially in our most vulnerable populations. Evidence suggests that one in five individuals globally could be at increased risk of severe COVID-19, due to underlying health conditions. The direct and indirect impact of COVID-19 on non-communicable diseases (NCDs) is still emerging. This Special Issue focuses on the impact of COVID-19 on NCDs diagnosis, treatment, prognosis, and management in the tropics. We are inviting papers which address the following topics:

- Original articles focusing on associations between COVID-19 and NCDs;
- Reviews on the associations between COVID-19 and NCDs (systematic and narrative reviews).

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
