Deadline for manuscript submissions:

closed (30 April 2023)

Message from the Guest Editors

According to the latest WHO report, nursing is the largest occupational group in the health sector, accounting for approximately 59% of health professionals (World Health Organization, 2020).

Nursing includes the promotion of health, prevention of illness, and the care of ill, disabled and dying people. Advocacy, promotion of a safe environment, research, participation in shaping health policy, inpatient and health system management, and education are also key nursing roles (International Council of Nurses, 2002).

Thus, nurses are present in all health-disease processes throughout the life cycle and in all care settings all over the world.

However, the WHO report also shows us that the world does not have a global nursing workforce commensurate with universal health coverage and SDG targets. In addition, nursing remains a highly gendered profession with associated biases in the workplace (World Health Organization, 2020).

It was in this context that nurses all over the world participated in the collective effort to fight the pandemic by being present on all possible fronts.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
