Message from the Guest Editors

Oral diseases represent one of the most common public health issues, and it should be compulsory to incorporate oral health into a general health agenda for optimal health and general well-being. The long-term sustainable strategy for global oral health must focus on health promotion and disease prevention, through controlling the modifiable common risk factors.

This Special Issue seeks research papers on various aspects of epidemiology, oral public health, oral health policies, prevention strategies, dental materials, techniques and treatments related to oral diseases in children, adults and the elderly.

We welcome original research papers using different study designs, as well as systematic reviews and meta-analysis.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
