Deadline for manuscript submissions:

closed (31 October 2020)

Message from the Guest Editors

This Special Issue welcomes research and scholarship on the political economy of global tobacco control with an emphasis on tobacco supply. We welcome historical analyses that trace changes over time as well as analysis of current contexts. This Special Issue will place specific emphasis on the following topics:

1. Policy process (e.g., how have tobacco interests affected the policy process, what levers (e.g., information, arguments, narratives, rules, norms) are utilized during the policy process to resist or support policies that seek alternatives to tobacco);
2. Institutions (e.g., what types of institutional arrangements perpetuate tobacco supply, what types of institutional arrangements have fostered alternatives to tobacco production and how);
3. Ideas (e.g., what types of ideas are dominant across health and economic sectors and to what effect, where do these ideas converge or diverge, how are these ideas mobilized, what types of ideas are implicit or explicit in institutions, how have ideas changed over time).

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
