Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Despite the prolific COVID-19 scientific production of the last year, many aspects of SARS-CoV-2 infection still remain to be explored. In this regard, the persistence of symptoms in COVID-19 symptomatic cases or even the onset of symptoms in asymptomatic COVID-19 cases and the long-term complications beyond 4 weeks or even 8–12 weeks after the coronavirus infection is attracting increasing interest in the scientific community as well as among patients, organizations, and societies.

In this regard, literature on epidemiology as well as pathophysiology, treatment proposals, and care models is still scarce. Moreover, it is unavoidable not to pay attention to the quality of life and the lived experiences of Long COVID patients as well as on health professionals' training needs and the impact of Long COVID on occupational health and society.

This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* focuses on the current state of knowledge on the Long COVID/post-COVID-19 syndrome.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
