submissions:

closed (30 September 2023)

Message from the Guest Editors

It has been almost two years since the COVID-19 outbreak changed the way humanity lives. Among the transformations, we find the core existential beliefs, the interpersonal relationships, the emotion regulation strategies, the perceptions of our mortality, time and space, the role of science and culture, and the sense of uncertainty and interdependence. This Special Issue aims to provide selected empirical, theoretical, and review contributions on the psychological changes and adaptations taking place in this pandemic period and on the necessary transformations of psychological interventions aimed at fostering well-being in different contexts.

Potential topics include but are not limited to: psychological aspects of long COVID syndrome, vaccine hesitancy, epistemic trust, and science conceptions, telepsychology and telepsychotherapy, effects of changes in psychotherapy setting, emotion regulation in quarantine and isolation, wellbeing and telework, relational changes in school and work setting, resilience, meaning making and post-traumatic growth, grieving in the pandemic, family relationships during pandemic, psychological treatment for health workers.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
