Quality of Life: The Interplay between Human Behaviour, Technology and the Environment

Message from the Guest Editors

We are arranging a Special Issue entitled "Quality of Life: The Interplay between Human Behaviour, Technology and the Environment". The main focus of this Special Issue is how people’s quality of life can be enhanced by optimizing the interplay between people, the environment and technology. Contributions should focus on the person or end-user and his/her environment, both the physical, social and digital environment, and on the interaction between people, health (care) and technology. The application domains of the Special Issue are sports and physical activity, nutrition and diet, health, care and rehabilitation. Recent advances in technology offer a wide range of solutions that support the aforementioned domains for a large number of end-users, both patients/clients from –9 months until 100+ years of age, as well as practitioners/physicians.

The purpose of this Special Issue is to publish high-quality research papers as well as review articles addressing recent advances in quality of life research with a focus on end-users and technology, both in the broadest sense of the word.

We look forward to hearing from you soon.
Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 19 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in 2018).
