Message from the Guest Editors

We are especially interested in the evaluation of unique organizations, models of care, the use of technologies and social media and management in a post-COVID-19 world, particularly in a cultural context, though other approaches will be considered. Topics of interest for this issue include human rights, legal and gender frameworks and participatory and decolonizing approaches. Papers may also wish to address policy, social and health care services, including specialized clinics, and nonprofessional management dealing with issues such as integration, mental health, women's health, children's health and access to food security, employment, education and appropriate interpretation services.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
