Disease Registries, Pisa, Italy

Dr. Ennio Cadum

Health Protection Agency,
Department of Hygiene and
Health Prevention and Complex
Operative Unit Health and
Environment and Innovative
Projects, Pavia, Italy

Message from the Guest Editors

This Special Issue offers an opportunity to publish high-quality interdisciplinary research and reviews on environmental health and risk perception. We welcome manuscripts specifically focusing on the risk perception evaluation of different stakeholders, on the use of risk perception data for decision making, to support governance or to provide information to nourish research design and dissemination, including research developed in the framework of COVID-19 viral infection outbreak. We will also consider articles tackling the issue of risk perception in the framework of political decision-making, and as a tool to reinforce and fine-tune communication campaigns and awareness-raising activities.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
