Message from the Guest Editors

Mental disorders are one of the greatest public health problems of our time. Researchers view mental disorders as having complex causes involving an interplay of biological, psychological and social factors.

The social determinants of mental health are the social and economic factors that influence people's mental health. Interventions targeting social determinants are likely to exert small but, from a public health point of view, potentially important effects on population mental health. Therefore, the investigation of the social determinants that affect mental health is essential.

This Special Issue is devoted to recent findings on "Social Determinants of Mental Health". A wide range of topics will be included in this issue, related, but not limited to, stress, living conditions, education, unemployment and job security, employment and working conditions, housing, social exclusion, mental health services, gender, race and disability.

We welcome the submission of Original Research Articles, Short Reports, Systematic Reviews and Meta-Analysis targeting any of these topics and beyond.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
