Message from the Guest Editors

The promotion of sexual health has been over-centered in the prevention of risks and diseases more than the positive aspects of wellbeing. This gap is being overcome by Comprehensive Sexual Education (CSE) programs allowing us to go beyond education about reproduction, risks and disease, which reaffirms the position of sexuality education within a framework of human rights and gender equality. However, sex education appeared as a range of different practices that were held together by the label "comprehensive sex education", and despite the extensive evidence on the effectiveness of CSE Programmers, there are several issues to face. First, CSE programs are described as an evidence-informed approach, but this approach of sex education as realistic and neutral, connected to science and facts, forgets the crucial role of the social and political context in which sex education programs are implemented. Second, CSE highlights the individualistic, neoliberal approach to sexuality, which reduces the attention to crucial issues such as power differences, sexual agency, and sexual pleasure.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
