Tygerberg 7505, South Africa

Deadline for manuscript  
submissions:

**closed (31 December 2023)**

### **Message from the Guest Editors**

Biomedical advancements in HIV prevention and the expansion of effective HIV treatment as well as other differentiated approaches applied to every stage of the HIV care cascade have led to a significant decrease in new HIV diagnoses and global aspirational commitment to end the HIV epidemic.

This Special Issue invites papers that highlight global and community-based effective HIV prevention interventions and policies that have led to a significant decrease in new HIV diagnoses as well as those that examine structural and societal factors impacting on increased access to HIV care, uptake of prevention options, successful treatment outcomes, and disengagement in care, particularly in underserved communities. HIV treatment access is key to the global effort to end HIV; thus, review articles, intervention studies, and research articles that propose new approaches to enhance prevention interventions, develop social enablers for HIV prevention, and maximize HIV treatment and care services to end the HIV epidemic are welcome in this issue.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
