Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editor

According to World Health Organization, Universal Health Coverage (UHC) means that all people have access to the health services that they need without financial difficulties, including the full range of essential health services, from health promotion to prevention, treatment, rehabilitation, and palliative care. UHC is identified as Target 3.8: "Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all". In order to achieve SDG 3, "Health and Well-being for All," it is important to evaluate and monitor the status of health care in each country using uniform indicators. For this Special Issue, we broadly invite manuscripts on the following areas related to UHC in life-course: financial risk protection; reproductive, maternal, newborn and children's health; infectious diseases; non-communicable diseases; mental health; substance abuse; health-related water and sanitation; and health service capacity and access, including human resources.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
