2. DTx Digital Transformation Colab, 4800 Guimarães, Portugal

Deadline for manuscript submissions:

**31 July 2024**

### Message from the Guest Editors

Dear Colleagues,

Emerging concepts and technologies, such as human-robot collaboration (HRC), augmented and virtual reality (AR/VR), cyber-physical systems (CPS), the Internet of Things (IoT), and nanotechnology, will constitute future working systems. These provide more efficient, more flexible, and higher-quality products, but they also carry a reorganization of the work, with a potential negative impact on workers' health and safety.

In parallel, the aging and eventual physical and cognitive limitations of the workers may aggravate occupational health problems (e.g., work-related musculoskeletal disorders), for which conventional workplaces and technologies are not always adequate. Therefore, it is crucial to create customizable human-centric workplaces fitting the workers' characteristics and their possible health limitations.

Safety and human wellbeing are the main challenges in this context, still requiring deep research, mainly in occupational environments, to test and validate the implementation of these novel technologies.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
