Message from the Guest Editors

With the changing composition of societies, there is growing attention to questions of social diversity and equal access to healthcare for vulnerable and minority populations. Nevertheless, empirical research on the question of access to healthcare still remains insufficient. Belonging to a vulnerable group can constitute a relevant obstacle to access to healthcare. Limitation of access to healthcare for these populations raises medico-ethical considerations and has negative consequences on the health outcomes of individual patients.

This Special Issue aims to bring together research articles concerning the question of equal access to healthcare for various minority populations, including but not limited to ethnic, cultural, or religious minorities, sexual and gender minorities, children, older or disabled persons, prisoners, etc. The Editors invite contributions from across the globe that not only examine structural and individual barriers to access to healthcare for these vulnerable groups but also that provide best-practice examples of facilitating access to healthcare for them.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
