Message from the Guest Editor

The study of adverse childhood experiences shows the long shadow that various forms of childhood trauma impose on subsequent health outcomes, mental health features, and behavioral functioning. In recent years, the application of adverse childhood experiences has greatly expanded in criminology and criminal justice and articulated ways these trauma experiences manifest in conduct problems. This Special Issue is broadly inclusive of data sources and analytical techniques that can further understanding of adverse childhood experiences and criminality, refine theory and conceptual models about trauma and its developmental cascades, or provide findings to inform behavioral interventions and public policy.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
