Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### **Message from the Guest Editor**

As we live longer, we know we will need a health system that understands what makes our care unique as we age. A health system is “age-friendly” when it is expertly designed to coordinate all our care as we age, while also making sure our personal needs, values, and preferences are at the heart of that care. A well-known 4M approach is knowing what *matters* to us as older adults when it comes to making healthcare decisions; reviewing, reducing, and removing *medications* that may cause harm or are unnecessary; improving care for the *mentation* (or the *mind*) by addressing critical problems such as dementia, delirium, and depression; and promoting *mobility*, or the medical term for being able to move (on our own or with help). Papers addressing these topics are invited to this Special Issue, especially those combining a high academic standard with a practical focus on creating an age-friendly health system.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
