Message from the Guest Editors

This Special Issue will collect theoretical or empirical manuscripts that can add knowledge and experiences in the field of addressing eco-innovation in the agri-food sector in order to reduce the use of natural resources, decrease the release of harmful substances, and improve an agri-food firm’s environmental performance. Covered topics include the definition of the concept of environmental innovation in farming and agri-food commercialization activities, the identification and evaluation of factors fostering eco-innovation, measurement tools for assessing eco-innovation implementation, organizational barriers, added value in farmers because of green innovations, new challenges to become more eco-innovative, among others. We will give priority to papers with a multidimensional approach to the analysis of environmental innovation in the agri-food sector.

Deadline for manuscript submissions:  
closed (30 November 2021)
Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

**Author Benefits**

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Public, Environmental & Occupational Health*) / CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
