Deadline for manuscript  
submissions:

**1 December 2021**

### Message from the Guest Editors

A guiding principle of public health is the acknowledgement that many diseases and disabilities are attributable, at least in part, to health-related behaviors. Accordingly, public health researchers and practitioners have long sought to investigate the myriad influences on health behavior, and to develop, implement, and disseminate health promotion programs designed to facilitate behavior change. This work is complicated by the fact that health behavior does not occur in a silo, and no one person or community shares the same influences; however, many programs have successfully identified and addressed barriers to behavior change in at-risk communities.

The purpose of this Special Issue, Health Promotion and Behavioral Epidemiology, is to highlight research that applies novel approaches to the study of health behavior (e.g., ecological momentary assessment, complex systems analysis) and/or the development and evaluation of health promotion programs. Papers on any health behavior and from any population are welcome, though papers that consider broader social, political, and environmental contexts of behavior are preferred.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Paul B. Tchounwou**

Department of Biology, College of Science, Engineering and Technology, Jackson State University, 1400 Lynch Street, Box 18750, Jackson, MS 39217, USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, GEOBASE, Embase, CAPlus / SciFinder, and many other databases.

**Journal Rank:** JCR - Q1 (*Public, Environmental & Occupational Health*) / 2020 CiteScore - Q2 (*Public Health, Environmental and Occupational Health*)
