Message from the Guest Editor

Dear Colleagues,

Significant achievements in conventional medical science and public health have advanced our knowledge about preventing and treating disease. Nevertheless, allopathic medicine is still a young science. Globally, there is recognition that traditional medical practices (ethnomedicine) continue to be utilized in the culture of origin. There is also recognition that many of these practices are being adopted and adapted for use outside the culture of origin—for example, Yoga, a part of Ayurveda, India's 5000-year-old medical system is increasingly being utilized and researched in the U.S. We are at a critical juncture to increase our knowledge of how traditional medicine is utilized, either alone or integrated with conventional medicine for healing, disease prevention, and health promotion.

This Special Issue seeks papers on ethnomedical approaches for healing, health, and well-being. We seek papers that examine the use of ethnomedicine for infectious diseases, mental illness, chronic diseases, pain, and other associated ailments.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
