Message from the Guest Editors

Dementia is becoming one of the biggest social health care challenges with the aging of the population worldwide. Because an effective curative care of dementia is not established, dementia prevention strategies or care strategies for dementia patients in circumstances surrounding aging societies are getting increasing attention. However, there is a lack of information about these issues. This Special Issue will feature articles regarding epidemiological studies or the review of strategies for dementia.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
