Telethon Kids Institute, University of Western Australia, Perth, Australia

**Dr. Jennifer Nicholas**

Orygen, Victoria, Australia; The Centre for Youth Mental Health, University of Melbourne, Victoria, Australia

**Dr. Kit Huckvale**

Black Dog Institute, University of New South Wales (UNSW), Sydney, Australia

Deadline for manuscript submissions:

**closed (31 January 2021)**

### Message from the Guest Editors

Digital technology provides a myriad of new opportunities beyond traditional approaches to improve mental health through screening, assessment, monitoring and the development and delivery of interventions. To date, the literature has largely focused on applications of technology within and for the general population, with less attention paid to the specific needs of marginalized groups. Given the mental health disparities commonly experienced by marginalized populations, further research is warranted to ensure that digital technologies do not further disadvantage these groups and, indeed, to actively address their unique experiences and requirements. We welcome rigorous research contributing to this aim, across a range of study designs. Specifically, the Special Issue aims to include research focused on (but not limited to) the following populations:

- LGBTIQ+;
- Seriously mentally ill;
- First Nations;
- Justice-involved people;
- Refugees;
- Any other group experiencing mental health disparities compared to the general population due to political, social, cultural or psychological factors.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPLus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
