Deadline for manuscript submissions:
closed (31 January 2019)

Message from the Guest Editor

3D scanners (intraoral, desktop and face scanners, cone beam computed tomography) and computer-assisted design/computer-assisted manufacturing (CAD/CAM) software, together with new aesthetic materials and powerful manufacturing and prototyping tools (milling machines and 3D printers) are radically transforming the dental profession. As a consequence, in recent years we are witnessing a real evolution of dental care. However, there is a need for scientific evidence regarding the new high-tech protocols and new materials. In the present thematic issue, we solicit the submission of original research articles (technological reports, case reports, case series, retrospective and prospective clinical studies, randomized controlled trials), as well as review articles, on the topics of digital dentistry.
Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

**Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, GEOBASE, Embase, CAPlus / SciFinder, and many other databases.

**Journal Rank:** *JCR* - Q1 (*Public, Environmental & Occupational Health*) / *CiteScore* - Q2 (*Public Health, Environmental and Occupational Health*)
