Message from the Guest Editors

A large body of research suggests that establishing and strengthening patient–provider relationships, characterized by empathy, transparency, respect, and trust, is one of the core elements of healthcare. Promoting these relationships also implies healthcare institutions focusing on and caring for the individual persons that are part of this connection. However, due to fragmented care and work pathways and time and staff rationing, the human aspects of clinical practice are too often ignored. Indeed, patients whose individual needs are underestimated experience a lack of respect and autonomy. Moreover, healthcare providers are mostly judged by their job performance, potentially leading to stress, compassion fatigue, and burnout. This trend has heightened the need for a integrative approach to healthcare that empowers patients and supports the healthcare workforce. This Special Issue aims to publish high-quality, timely research on various aspects of patient empowerment in care and risk management, as well as the impact of patient safety culture, work-related stressors, and unanticipated clinical events on healthcare providers' wellbeing.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
