closed (31 December 2009)

Message from the Guest Editor

Dear Colleagues,

Advances in epidemiology can occur when interdisciplinary knowledge is applied to research design, implementation or interpretation. The goal of this special issue is to highlight novel theoretical, methodological or technological advances in epidemiological research on human exposures to anthropogenic factors and public or occupational health. Empirical papers on research using emerging or novel theories, methods or technologies are encouraged as are review papers that point to new directions of research with broad applicability and relevance for public and occupational health.

Dr. Scott A. Venners

Adelaide University, Adelaide
5001, Australia

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
