Message from the Guest Editor

The health impacts of climate change are important and increasing concerns for citizens living in urban areas. With the emerging risk of climate change, the health impacts are related to socioeconomic damage and vulnerability including individual health status, occupational risk, social inequality, as well as community health.

This Special Issue plans to provide an overview of the most recent advances in the field of public health, environmental studies, urban studies, and occupational health and safety. It aims to cover promising, recent, and innovative research studies on scientific analyses, evaluation, projection, policy issues, and strategies related to climate change and health in urban areas. Topics to be covered in this Special Issue may include, but are not limited to: the impacts of climate change on public health; health vulnerability and socioeconomic vulnerability to climate change; policy mechanisms and evaluation to mitigate the negative impacts of public health; economic analysis about public health impacts and socioeconomic changes; estimation about mortality related to climate change.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
