Deadline for manuscript submissions: closed (31 October 2018)

**Message from the Guest Editors**

Non-communicable lung diseases, tuberculosis (TB), and pneumonia are leading causes of morbidity and mortality worldwide. The inhalation of polluted air—including household air pollution, outdoor air pollution, and air pollution from tobacco smoke—is a major cause of lung disease, causing around 13 million deaths globally each year. Most of this burden falls on the people living in low- and middle-income countries.

In recognition of the magnitude of the global health challenges represented by lung diseases, tuberculosis, and air pollution, you are invited to submit manuscripts to be considered for publication in this Special Issue on “Lung Health, Tuberculosis, and Air Pollution in Low- and Middle-Income Countries”. We will particularly welcome submissions from sub-Saharan Africa.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 19 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in 2018).
