Deadline for manuscript  
submissions:

**closed (31 October 2021)**

### Message from the Guest Editors

The information and communication technologies (ICTs) revolution currently allows brand new and effective tools to improve assessment, management, and intervention opportunities to improve wellbeing and health support. In particular, the possibility to ensure continuous medical services overall for chronic, comorbid, and complex diseases would reduce the cost of extended traditional assistance. Such technologies could increase access to health-related services, allowing an adaptive approach for assessment and intervention procedures. Moreover, insights coming from big data and mobile technologies could be exploited for the empowerment of both patients and caregivers throughout advanced and scientifically grounded ICT-based services (e.g., real-time counseling, coaching system, artificial intelligence, home-based computer system). In this regard, technological advancements may play an interesting role in supporting therapeutic compliance, promoting wellbeing, and enhancing health-related protective factors.

Papers addressing these topics are invited for this Special Issue, especially those combining a high academic standard coupled with a practical focus.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
