Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editors

Research has shown that in the same way that healthy relationships improve mental and physical health, toxic relationships deteriorate health. Recent research has also shown that healthy or toxic intimate relationships are related to the kind of masculinities of the male partners.

This Special Issue will explore the influences on health of the different masculinities. Since the problem is multidimensional, this Special Issue seeks manuscripts reporting evidence of success in overcoming toxic relationships and their associated health problems, from all sciences, including interdisciplinary contributions, among others.

We welcome manuscripts that report a wide diversity of research methods; qualitative studies may include case studies, including a single case or biographical methods, among others. Studies that report quantitative methods and surveys as well as contributions using a mixed-methods approach are also welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
