Message from the Guest Editors

For this Special Issue, we wish to publish a collection of studies aimed at the improvement of mental health systems. This includes research dedicated to the development of standardized tools for the comparison of resources, mapping, identifying barriers, and increasing the effectiveness and quality of mental health provision systems at local, regional, and national levels, all with the objective of guiding financing policies of mental health systems and ensuring they are better integrated in general health systems.

Objectives:

- Develop standardized measurement tools to
 - evaluate mental health services
 - analyze mental health care quality, effectiveness, and efficiency
 - analyze mental health care distribution and organization
- Compare mental health systems (financing, policies, care provision)
- Propose improvements in the quality of mental health services
- Propose improvements in the efficiency of mental health services

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
