Katowice, Poland

Deadline for manuscript
submissions:

closed (30 September 2021)

Message from the Guest Editors

Dear Colleagues,

Perioperative medicine covers a broad spectrum of pharmacological and nonpharmacological interventions needed to guarantee patients' safety and to minimize the risk of complications. Both functional and structural neurologic injury represent a serious hazard of the compromised outcome in anesthesiology and intensive care medicine. In recent years, there has been a growing interest in preventive measures and treatment strategies that could be implemented to reduce insults to the brain. Goal-directed therapy is recommended to all subjects at risk of neurologic complications. However, effective neuroprotection and adequate treatment are still in question.

This Special Issue seeks high-quality manuscripts on neuroprotection and treatment of patients undergoing cardiac and noncardiac surgery, as well as in the critically ill. We welcome original papers, systematic reviews, and meta-analyses, and thorough reviews on this interesting topic. We would be happy if this Special Issue provides a complex source of up-to-date data used by anesthesiologists and intensive care specialists worldwide to improve perioperative care.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
